#### REMARKS

The undersigned requests a personal interview with the Examiner in charge of this application to discuss the issues raised in the comments below.

Claim 15 was objected to because of an informality. This claim has been canceled.

Claims 1-5 and 8-9 were rejected as being anticipated by Angelopoulos (6,341,871).

Claims 6-7 were rejected as being unpatentable over Angelopoulos.

Claims 10-15 were rejected as being unpatentable over Rogers (6,755,549).

Angelopoulos discloses a cell phone with a light plugged in at the bottom of the phone and a light within a compartment of the phone.

Rogers has a cell phone with an LED to provide illumination where needed.

In view of the excellent art cited by the Examiner, independent claims 1 and 10 have been extensively amended to recite features of the invention not found or suggested in the above references.

Claim 1 has been amended to recite the light mounted on the distal end of the antenna with an on/off switch for the light located in the housing adjacent the antenna. These features do not appear to be in the art the Examiner cited.

Claim 10 as amended calls for a light unit plugged into the connection port used to recharge the battery in the phone, the phone having a switch for energizing the light unit when plugged into said connection port. These features also appear to be lacking in the art cited by the Examiner.

Claims 4-9 and 13-15 have been canceled. The remaining claims all depend from either claim 1 or claim 10 and would be allowable along with their parent claims.

In view of the foregoing, it is believed that the claims now in the case clearly distinguish over the art of record and should be allowed.

A conscientious effort has been made to place this application in condition for immediate allowance. The Examiner is requested to call the undersigned or Mr. Kroll if further changes are required to obtain allowance of the application.

A favorable action is solicited.

Respectfully submitted,
